PROFILE SUMMARY

Student with hands-on experience in JavaScript frameworks like Next.js, and back-end solutions using Spring Boot and Node.js. Eager to learn, build real-world applications, and grow through internship opportunities.

EDUCATION

Diploma in Software Engineering

Institute of Computer Engineering Technology (ICET) – 2024

- Content: Java, Object Oriented Programming, MySQL, JDBC, Application Architectures, JavaFX, Java Swing, Angular, Spring Boot , Java

GCE A/L - 2023(2024) Technology Stream

Mihindu Central College, Agalawatta

GCE O/L – 2020

Meril Kariyawasam Central College, Meegahathanna

PROJECTS

- **MOS Burgers Web System**

A web-based Point of Sale system developed for a burger shop using HTML, CSS, and JavaScript. The system allows cashiers to place customer orders efficiently, while admins can manage products and customer information. Designed with a simple and intuitive interface to streamline order processing in a fast-paced food service environment.

Technologies: HTML, CSS, JavaScript

- **Hospital Management POS System**

A JavaFX-based desktop application designed to streamline hospital operations. It includes role-specific features for doctors, patients, and administrators, with secure data management via Hibernate and MySQL.

Key Features: Appointment scheduling, prescription management, user profile settings, and admin reports.

- **EVO planner**

A full-stack event management platform built with Spring Boot (JPA, Hibernate, Security), MySQL, and Angular, featuring an AI-powered chatbot and real-time messaging system for admins, customers, and suppliers.

Skills

- **Front-End Development** – ReactJS, Tailwind CSS, Bootstrap, JavaScript, TypeScript, HTML, CSS, JavaFX
- **Back-End Development** – Spring Boot, Node.js, Express.js
- **Database** - MySQL
- **Other** - Git, GitHub, Docker, REST APIs, Hibernate, Visual Studio Code, IntelliJ IDEA
