

Sandaruwan Weerawardhana

INTERN SOFTWARE ENGINEER

Kaluthara | +94 704679789 | weerawardanasw@gmail.com

| [\[LinkedIn\]](#) | [\[GitHub\]](#) | [\[Portfolio\]](#)

SUMMARY

Full-stack engineer with over 3 months of hands-on industry experience. Skilled in front-end development with JavaScript technologies and back-end systems using Node.js, Spring Boot, and Java.

EXPERIENCE

Software Engineer Trainee | ICET

Aug 2024 – May 2025

- Applied Agile methodology in real-world settings.
 - Used UML diagrams and fine-tuning techniques to contribute effectively in project teams.
 - Enhanced communication and collaboration within cross-functional environments.
-

PROJECTS

Evo Plan – Spring Boot + Angular

[\[GitHub\]](#)

- Developed the Supplier module using Angular and Spring Boot
- Built secure RESTful APIs and responsive interfaces
- Integrated MySQL for data persistence.
- Collaborated with a team to enhance supplier management functionality

Technologies: Angular, Spring Boot, Hibernate, MySQL, TypeScript, JWT, Bootstrap

Car Rental System – React + Spring Boot

[\[GitHub\]](#)

- Built a full-stack application with user and admin features.
- Developed React.js frontend with JWT-based Spring Boot backend.
- Implemented secure data handling with JPA/Hibernate and MySQL.

Technologies: React, Spring Boot, Hibernate, MySQL, JWT, Tailwind CSS, Docker

WhatsApp Bot – Nestjs

[\[GitHub\]](#)

- Built with NestJS using a clean and organized project structure.
- Uses GPT models to generate smart replies based on user messages.
- Uses the WhatsApp Cloud API to send and receive messages instantly.
- Uses a .env file to manage API keys and other sensitive data safely.

Technologies: Nest js, Webhook, ngrok,

Mos Burger – HTML + CSS + Spring Boot

[\[GitHub\]](#)

- Developed a Point-of-Sale system using HTML, CSS, JavaScript.
- Enabled order processing and admin controls in a fast-paced environment.

Technologies: Spring Boot, JavaScript, Tailwind CSS, HTML, Hibernate, MySQL

Hospital Management POS System

[\[GitHub\]](#)

- JavaFX-based desktop system with role-specific features.
- Managed secure data operations using Hibernate and MySQL.

Technologies: Java, JavaFX, Hibernate, MySQL

2D Car Game – HTML + CSS + Java Script

[\[GitHub\]](#)

- Created a browser-based game with dynamic UI and animations.
- Implemented game logic, collision detection, and responsive design.

Technologies: HTML, JavaScript, CSS

TECHNICAL SKILLS

- | | | |
|----------------|-----------------|---------------|
| • Java | • Node.js | • Bootstrap |
| • JavaScript | • Docker | • Postman |
| • TypeScript | • OpenAI | • Agile/Scrum |
| • Tailwind CSS | • MySQL | • JWT/OAuth2 |
| • Spring Boot | • JavaFX | • Swagger |
| • React.js | • Hibernate/JPA | • Git/GitHub |
| • Angular.js | • AWS (S3) | |

EDUCATION

Diploma in Software Engineering | ICET

Aug 2024 – Apr 2025

[Java, Object Oriented Programming, MySQL, JDBC, Application Architectures, JavaFX, Java Swing, Angular, Spring Boot]

CERTIFICATIONS

- Introduction to Containerization - CoDeKu DevOps Academy
- SQL (Basic) Certificate – HackerRank
- Introduction to Cloud Computing – CoDeKu DevOps Academy
- Personal Computer Based Application – VTA
